

CHIP Meeting Minutes 2020_10_30

Present:

El Camino/Los Gatos Health Library (Michael Liddicoat)
Natividad Medical Center, (Cynthia Johnson)
Samuel Merritt University (Hai-Thom Sota)
Samuel Merritt University, Oakland (Sarah Naumann)
Santa Clara Valley Medical Center (Judith W. Mills)
Santa Clara Valley Medical Center (Hella Buhm-Stieber)
Sophia University (Lisa Sammon)
Stanford Health Library (James Liu)
Stanford Health Library – Cancer Center South Bay (Sandra Erickson)
Sutter Health, PAMF/SMU (Geri Bodeker)
Sutter Health, Roseville (Heidi Jean Mortensen-Torres)

Welcome

Heidi welcomed everybody to the WebEx meeting and introduced our guest speaker.

RedakTec Presentation

Our guest speaker, Rick Meyler, was recommended by Mike Liddicoat.

Rick was manager of technical support for EndNote before he founded RedakTec, two years ago. Redak Tec is looking at the integrity of scientific research by looking at the number of retracted articles that are being cited in a research article. Articles could be retracted because of plagiarism, fraud, data error, or bad methodology. Redak Tec also looks at self-citing authors, journals that do not retract articles, etc. The number of retracted articles is increasing.

RedakTec uses the Microsoft Academic Database from 2018 as data source to build the software. They hope to have the product finished, end of the year.

Rick Meyler wants to make it free for us, then \$1/month per researcher. They plan to charge publishers and institutions. They work with some librarians. The software will work on top of other databases, also on preprint and OA servers.

The product is at <http://redactek.com> , marketing materials are at <http://release.redactek.com>

Approve minutes from the last meeting.

Cynthia made a motion to approve the minutes.

James seconds. Minutes were approved.

Providing virtual library services during COVID-19 times (Judith)

James: Health libraries put out many videos, available to everybody. Videos generated quite a bit of questions on website. Statistics on video use went up. <https://healthlibrary.stanford.edu/lectures-events.html>

Lane Health Libraries: sign ups for their online classes has gone up.

Cynthia had to add extra IP addresses for VPN etc. for remote access.

Hella: many users have problems with remote access to database, might be also IP-related.

Judith: increase in virtual need for services.

Onsite or virtual library services

James: librarians will not go back onsite until 2021.

Judith is working full-time remotely on contact tracing and library work. CICT has a backlog.

Vaughn and Hella were trained as contact tracers, are on reserve since end of September, and are now working part-time as temperature screeners and part-time at the Medical Library.

James does contact tracing, 3 days a week.

Hai-Thom will be online until May. Very limited on-campus access at some point.

Lisa: virtual during Winter semester. Goes one day/week to library. She shifted the budget to buy e-books and other e-resources.

Yahoo Group?

Do we need another e-mail group?

Yahoo groups will be discontinued in December 2020. Alternatives could be GoogleGroups or Groups.io.

Cynthia asked if we could have a group under MLA.

Cynthia: Many hospitals are shutting down GoogleDocs and Dropbox because of security concerns.

Judith does not see a need for a new e-mail group.

It was decided that the current e-mail distribution list and website are sufficient.

Candidates for CHIP offices

Candidate for president: Sarah Naumann.

Anybody interested in the secretary position?

Judith thanked Heidi for her service as president.

Geri thanked Mike for all his services. Mikes hours have been reduced to two days/month.

ILLs from Stanford

All Stanford ILLs seem to be copyright restricted now. James will check with Lane Library. Is only transmission in print allowed? Can they be faxed?

AccessMedicine renewal for CHIP.

Cynthia, AccessMedicine will honor CHIP pricing, they will invoice us separately. We no longer have to sign a contract.

Next Meeting: February 2021

Submitted by Hella Bluhm-Stieber
San Jose, CA
