

# Craft the Conversation: optimize shared decision-making with patient decision aids

*Option Grid*™ decision aids are brief, easy-to-understand tools that help patients and clinicians make preference-sensitive healthcare decisions by comparing options.

## **Option Grid** decision aids at a glance

- **Evidence-based:** Content creation follows a strict, evidence-based process
- **Unbiased:** Developed without conflicts of interest
- **Empowers patients:** Helps patients share what matters most to them
- **Easy to read:** Uses patient-friendly language
- **Patient-tested:** Co-developed with patients to ensure the patient voice is heard
- **Simple to use:** Can be used in clinical visits without adding extra time
- **Meets requirements:** Meets all shared decision-making policy requirements and incentives
